

POTEN & PARTNERS

ATHENS / GUANGZHOU / HOUSTON / LONDON / NEW YORK / SINGAPORE / PERTH

## LNG Consulting Department

### **Analyst: LNG Consulting Department, New York NY 10022**

#### **About Poten & Partners:**

Poten & Partners is an international, employee owned, company providing consulting, commercial advisory, and brokerage services to the energy and ocean transportation industries. Poten has over 150 employees located in seven offices around the globe. The Natural Gas and LNG Consulting team at Poten is the world's premier advisor on commercial, economic and technical issues for natural gas and liquefied natural gas (LNG). Many of our team members are world experts in their field and have held senior positions in major energy companies. We advise major international oil and gas companies, national oil companies, shipping companies, project developers, financial institutions and governments on strategy and the development of LNG and gas projects and markets throughout the world. The group comprises about 35 professionals and advisors located in New York, Houston, London, Singapore and Perth, Australia. We operate as small teams in a flat organization and analysts work closely with the senior staff.

#### **About the position:**

Poten is seeking a full-time analyst to join our New York office in the heart of East Midtown, Manhattan. The analyst will join the Americas LNG Consulting team that provides research and analysis for multi-client and single-client consulting projects. The LNG industry, which liquefies natural gas for transport in purpose-built tankers to markets around the globe, is the fastest growing part of the global oil and gas business and highly capital intensive with project costs in the many billions of dollars. Natural gas, the cleanest burning hydrocarbon fuel, is a key contributor to the transition to an environmentally friendly energy future offering the world an opportunity to cut greenhouse gas emissions with today's viable technology.

The successful analyst will be expected to contribute to all areas of the consulting business, including analysis of LNG, gas and power markets and policy trends in countries and regions worldwide, LNG liquefaction, shipping and import projects, etc.

An ideal candidate would be a recent graduate with a strong interest in the energy industry.

#### **Required Qualifications:**

- Bachelor degree in engineering, economics, business and/or international affairs (with a focus on energy markets). Advanced degree preferred, but not required.
- At least 2 years of prior work experience preferably in data analysis, consulting or other research roles

- Excellent analytical and modeling skills, including the ability to research and quantitatively analyze industry data with the capacity to develop and maintain detailed spreadsheets and models.
- Strong communication skills, both written and verbal, including the ability to clearly and concisely prepare and present reports and presentations.
- Strong computer skills including advanced knowledge of Microsoft Excel, Word and PowerPoint.
- High energy level, poise and professionalism when interacting with internal and external contacts.
- The ability to prioritize workload, work independently, and ensure the team meets deadlines.
- Possesses high level of trust on completeness and accuracy of analysis.
- Must be comfortable in a team role, flexible and diligent in meeting the requirements of this fast paced and very demanding position.

**To Apply:**

To be considered for this position, please email your cover letter and CV to [lngcareers@poten.com](mailto:lngcareers@poten.com).

Unfortunately, due to the high volume of applicants, we are unable to contact each candidate directly – however if you are selected you will be notified via phone call or email to schedule a phone and/or in-person interview.
