Natural Gas & LNG Consulting

2019 Summer Internship: Natural Gas & LNG Consulting Department,

New York or Houston Office

About Poten & Partners:

Poten & Partners is an international, company providing consulting, commercial advisory, and brokerage services to the energy and ocean transportation industries. Poten has over 150 employees located in seven offices around the globe. The Natural Gas and LNG Consulting team at Poten is the world's premier advisor on commercial, economic and technical issues for natural gas and liquefied natural gas (LNG). Many of our team members are world experts in their field and have held senior positions in major energy companies. We advise major international oil and gas companies, national oil companies, shipping companies, project developers, financial institutions and governments on strategy and the development of LNG and gas projects and markets throughout the world. The group comprises about 40 professionals and advisors located in New York, Houston, London, Singapore and Perth, Australia. We operate as small teams in a flat organization and analysts work closely with the senior staff.

About the position:

Poten is seeking a Summer intern to join our New York or Houston office. The intern will support the LNG Consulting team in New York or Houston in providing research and analysis for multi-client and single-client consulting projects. The LNG industry, which liquefies natural gas for transport in purpose-built tankers to markets around the globe, is the fastest growing part of the global oil and gas business and highly capital intensive, with project costs in the many billions of dollars. Natural gas, the cleanest burning hydrocarbon fuel, is a key contributor to the transition to an environmentally friendly energy future offering the world an opportunity to cut greenhouse gas emissions with today's viable technology.

The intern will be expected to contribute to all areas of the consulting business, including analysis of LNG, liquefaction, shipping and import projects as well as gas and power markets.

An ideal candidate would be a current student pursuing an advanced degree (post-bachelors) with a strong interest and passion for the energy industry.

The internship will provide opportunities to learn about energy consulting field, develop applicable competencies, and network with Poten consultants and analysts responsible for coverage of global LNG market and technical analysis.

Required Qualifications:

- Educational background in engineering, economics, business and/or international affairs.
- Demonstrated strong interest in international energy.
- Excellent analytical and modeling skills, including the ability to research and quantitatively analyze industry data with the capacity to develop and maintain detailed spreadsheets and models.
- Strong computer skills including advanced knowledge of Microsoft Excel, Word and PowerPoint.
- Communication skills, both written and verbal, including the ability to clearly and concisely prepare and present reports and presentations.
- Must be comfortable in a team role, flexible and diligent in meeting the requirements of this challenging internship.

To Apply:

To be considered for this position, please email your cover letter and CV to lngcareers@poten.com by April 30, 2019. Tentative start date for the internship is June 1, 2019 but please indicate in application preference in office location (New York or Houston) and how much time you can commit to working with us this summer.

Unfortunately, due to the high volume of applicants, we are unable to contact each candidate directly – however if you are selected you will be notified via phone call or email to schedule a phone and/or in-person interview.
